Castellazzo B.da, 27/10/2014

SUBJECT: Report on the characteristics of the Security System installed at the new the company's headquarters at the company Piccin Arte Srl, Via Vincenzo Monti n.52 - Mazzo di Rho (MI.)

Introduction.

Our company specializes in the installation of security systems and remote management on a 0/24 basis, from Central operating station.

This is an integrated system with the alarm, video surveillance, Central Operating Station manned on a 0/24 basis, and event management and co-ordination of emergency intervention with armed guards.

This new generation system, allows an analytic alarm transmission through the use of three different vectors of communication and simultaneously allows the reception of the images related to the event, consisting of a various frames pre- and post- of the same event. In this condition, the integrated software platform in Central Office enables the unequivocal diagnosis of the type of alarm (false or real).

The central operating station software monitors with cyclic queries and statistics, the correct operation functioning of the alarm system, camera and video recording system. Our company provides a service of technical assistance 0/24 basis.
